

American Railway Engineering and Maintenance-of-Way Association

CHAPTER 28

CLEARANCES¹

TABLE OF CONTENTS

Part/Section	Description	Page
1	Clearance Diagrams – Fixed Obstructions	28-1-1
1.1	Special Notes (1984)	28-1-2
1.2	General Outline (1983)	28-1-3
1.3	Railway Bridges (1983)	28-1-4
1.4	Single-Track Railway Tunnels (1983)	28-1-5
1.5	Double-Track Railway Tunnels (1983)	28-1-6
1.6	Railway Side Tracks and Industrial Tracks (1983)	28-1-7
1.7	Highway Structures Over Railroads (2001)	28-1-8
1.8	Overhead Electrification (1983)	28-1-10
2	Equipment Diagrams	28-2-1
2.1	Diagrams	28-2-2
3	Methods and Procedures	28-3-1
3.1	Clearance Allowances for Horizontal Movements of Passenger Cars due to Lateral Play, Wear and Spring Deflection	28-3-3
3.2	Suggested Method of Presenting Published Clearances	28-3-9
3.3	Suggested Methods for Charting All Obstructions	28-3-10
3.4	Instructions Regarding Information to be Reported for an Excess Dimension Load or Miscellaneous Railroad Equipment Involving Clearances, Weight and High Center of Gravity	28-3-11
3.5	Computing Curve Offsets on Loads	28-3-19
3.6	Legal Clearance Requirements	28-3-20
3.7	Methods of Measuring Railway Line Clearances (2006)	28-3-49
3.8	Definitions of Words Used in Railroad High and Wide Clearances	28-3-52
3.9	Field Handbook of Recommended Practice for Measuring Excess Dimension Loads	28-3-52

¹ The material in this and other chapters in the AREMA *Manual for Railway Engineering* is published as recommended practice to railroads and others concerned with the engineering, design and construction of railroad fixed properties (except signals and communications), and allied services and facilities. For the purpose of this Manual, RECOMMENDED PRACTICE is defined as a material, device, design, plan, specification, principle or practice recommended to the railways for use as required, either exactly as presented or with such modifications as may be necessary or desirable to meet the needs of individual railways, but in either event, with a view to promoting efficiency and economy in the location, construction, operation or maintenance of railways. It is not intended to imply that other practices may not be equally acceptable.

TABLE OF CONTENTS (CONT)

Part/Section	Description	Page
3.10	Recommended Procedure to Insure that Additions or Modifications to Clearances are Promptly and Properly Reported to Clearance Engineer	28-3-61
3.11	Recommended Procedure for Safe Movement of Oversize and Overweight Shipments on Foreign Trackage/Joint Tracks	28-3-65
3.12	Maintenance Procedures That Can Adversely Effect Clearances (2009)	28-3-66
3.13	Preserving Existing Clearance During Maintenance Work	28-3-70
3.14	Naturally Occurring Events That Can Alter Clearances	28-3-71
3.15	Train Dynamics that can Affect Clearances	28-3-73
Chapter 28	Glossary	28-G-1

INTRODUCTION

The Chapters of the AREMA Manual are divided into numbered Parts, each comprised of related documents (specifications, recommended practices, plans, etc.). Individual Parts are divided into Sections by centered headings set in capital letters and identified by a Section number. These Sections are subdivided into Articles designated by numbered side headings.

Page Numbers – In the page numbering of the Manual (28-2-1, for example) the first numeral designates the Chapter number, the second denotes the Part number in the Chapter, and the third numeral designates the page number in the Part. Thus, 28-2-1 means Chapter 28, Part 2, page 1.

In the Glossary and References, the Part number is replaced by either a “G” for Glossary or “R” for References.

Document Dates – The bold type date (Document Date) at the beginning of each document (Part) applies to the document as a whole and designates the year in which revisions were last made somewhere in the document, unless an attached footnote indicates that the document was adopted, reapproved, or rewritten in that year.

Article Dates – Each Article shows the date (in parentheses) of the last time that Article was modified.

Revision Marks – All current year revisions (changes and additions) which have been incorporated into the document are identified by a vertical line along the outside margin of the page, directly beside the modified information.

Proceedings Footnote – The Proceedings footnote on the first page of each document gives references to all Association action with respect to the document.

Annual Updates – New manuals, as well as revision sets, will be printed and issued yearly.
