

American Railway Engineering and Maintenance-of-Way Association

2008 Portfolio of Trackwork Plans

TABLE OF CONTENTS

<i>Plan No.</i>	<i>Title</i>	<i>Plan No.</i>	<i>Title</i>
100-08	Specifications	Switches (Continued)	
101-06	Definitions of Terms	222-08	Switch Rods and Clip
Switches		223-08	Gage Plates
111-08	16'-6" Straight Split Switch with Uniform Risers for Track Spikes or Screw Spikes	224-08	Switch Plates and Adjustable Boltless Rail Braces
112-08	16'-6" Straight Split Switch with Graduated Risers for Track Spikes or Screw Spikes	241-03	Details and Typical Applications of Hook Twin Tie Plates
121-08	13'-0" Curved Split Switch with Uniform Risers for Track Spikes or Screw Spikes	Switch Stands	
122-08	13'-0" Curved Split Switch with Graduated Risers for Track Spikes or Screw Spikes	251-01	Switch Stands and Appurtenances
123-08	19'-6" Curved Split Switch with Uniform Risers for Track Spikes or Screw Spikes	255-01	Plan and Specifications for Switch Lock
124-08	19'-6" Curved Split Switch with Graduated Risers for Track Spikes or Screw Spikes	Frogs - General	
125-08	26'-0" Curved Split Switch with Uniform Risers for Track Spikes or Screw Spikes	300-08	Recommended Usage of Various Types of Frogs
126-08	26'-0" Curved Split Switch with Graduated Risers for Track Spikes or Screw Spikes	Bolted Rigid Frogs	
127-08	39'-0" Curved Split Switch with Uniform Risers for Track Spikes or Screw Spikes	325-03	Steel Frog Fillers and Reinforcing Bars
128-08	39'-0" Curved Split Switch with Graduated Risers for Track Spikes or Screw Spikes	350-03	Tee Rail Flares for Frog and Crossing Flangeways
181-08	16'-6" Spring Switch	Spring Rail Frogs	
182-08	19'-6" Spring Switch	401-03	No. 10 Spring Rail Frog
183-08	26'-0" Spring Switch	407-03	No. 9, No. 11, and No. 12 Spring Rail Frog
190-03	Diagram Illustrating Preferred Names of Parts for Split Switches	490-03	Diagram Illustrating Preferred Names of Parts for Spring Rail Frogs
209-08	Classified and Numerical Index of Detail Numbers Covering Switch Material	Guard Rails	
213-03	11'-0" Split Switch Point Derail	502-03	Setting for Guard Rails - Tee Rail Design
220-08	Manganese Steel Points for Split Switch	504-03	Guard Rails - Tee Rail Design with Planed Flares and Flat Plates
221-08	Details for Switch Points	505-01	Specifications for Guard Rail Clamps
		510-01	Manganese Steel - One-Piece Guard Rail
		590-03	Diagram Illustrating Preferred Names of Parts for Guard Rails
		Rail Bound and Solid Manganese Frogs	
		600B-03	Point and Flangeway Dimensions for Manganese Frogs and Crossings
		621-03	Data and Sections for Rail Bound Manganese Steel Frogs for Rails 112 lb. and Heavier - Heavy Wall

<i>Plan No.</i>	<i>Title</i>
Rail Bound and Solid Manganese Frogs (Continued)	
622-03	No. 6, No. 7 and No. 8 Rail Bound Manganese Steel Frogs for Rails 112 lb. and Heavier - Heavy Wall
623-03	No. 9, No. 10 and No. 11 Rail Bound Manganese Steel Frogs for Rails 112 lb. and Heavier - Heavy Wall
624-03	No. 12, No. 14 and No. 15 Rail Bound Manganese Steel Frogs for Rails 112 lb. and Heavier - Heavy Wall
625-03	No. 16, No. 18 and No. 20 Rail Bound Manganese Steel Frogs for Rails 112 lb. and Heavier - Heavy Wall
641-03	Solid Manganese Steel Self Guarded Frogs
671-03	Solid Manganese Steel Frogs
690-01	Diagram Illustrating Preferred Names of Parts for Rail Bound Manganese Steel Frogs
691-01	Diagram Illustrating Preferred Names of Parts for Solid Manganese Steel Frogs

Crossings - General

700-01	Crossing Designs and Recommended Practices
700A-01	Types of Crossing Frogs in Use as Related to Speed, Tonnage, etc.
700B-01	Compromise Joints - Compromise Rails
700F-01	Tie Layouts and Plates for Crossing Angles 90 Deg. to 60 Deg. Incl.
700G-01	Tie Layouts and Plates for Crossing Angles Below 60 Degrees to 35 Degrees Incl.
700H-01	Tie Layouts and Plates for Crossing Angles Below 35° to Above 14° 15' Incl.
700J-01	Tie Layouts and Plates for Crossing Angles 14° 15' to 9° 31' 38" Incl.

Bolted Rail Crossings

701-01	Bolted Rail Crossings, Angles 90° to 50° Incl., Three-Rail Design
702-01	Bolted Rail Crossings, Angles 90° to 50° Incl., Two-Rail Design
703-01	Bolted Rail Crossings, Angles Below 50° to 35° Inclusive, Three-Rail Design
704-01	Bolted Rail Crossings, Angles Below 50° to 35° Inclusive, Two-Rail Design
705-01	Bolted Rail Crossings, Angles Below 35° to 25° Inclusive, Three-Rail Design
706-01	Bolted Rail Crossings, Angles Below 35° to 25° Inclusive, Two-Rail Design
708-01	Bolted Rail Crossings, Angles Below 25° and Above 14° 15'
710-01	Bolted Rail Crossings, Angles 14° 15' to 9° 31' 38" Inclusive

Crossings – Foundations For

721-01	Design of Reinforced Concrete and Pile Crossing Foundations
--------	---

<i>Plan No.</i>	<i>Title</i>
Manganese Steel Insert Crossings	
746-01	Manganese Steel Insert Crossings, Angles 90° to 70° Incl.
747-01	Manganese Steel Insert Crossings, Angles Below 70° to 60° Incl.
748-01	Manganese Steel Insert Crossings, Angles Below 60° to 45° Incl.
749-08	Designs and Dimensions of Manganese Steel Inserts for Crossings of Angles 90° to 45° Incl.
750-01	Designs and Dimensions of Manganese Steel Inserts for Crossings of Angles Below 45° to Above 14° 15' for Rails 6" and More in Height
751-02	Designs and Dimensions of Manganese Steel Inserts for Crossings of Angles Below 45° to Above 14° 15' for Rails Less than 6" in Height
755-02	Manganese Steel Insert Crossings, Angles Below 45° to 35° Inclusive
757-02	Manganese Steel Insert Crossings, Angles Below 35° to 25° Inclusive
761-02	Manganese Steel Insert Crossings, Angles Below 25° and Above 14° 15'
768-02	Manganese Steel Insert Crossings, Angles 14° 15' to 9° 31' 38", Inclusive for Rails Less than 6" in Height
769-02	Manganese Steel Insert Crossings, Angles 14° 15' to 9° 31' 38", Inclusive for Rails 6" and More in Height

Solid Manganese Steel Crossings

771-02	Solid Manganese Steel Crossings, Angles 90° to 60° Inclusive
772-02	Solid Manganese Steel Crossings, Angles Below 60° to 40° Inclusive
773-02	Solid Manganese Steel Crossings, Angles Below 40° to 25° Inclusive
774-02	Crossings with Solid Manganese Steel Frogs and Interior Rolled Closure Rails, Angles Below 25° 00' and Above 14° 15', Single Rail Construction
775-02	Crossings with Solid Manganese Steel Frogs and Interior Rolled Closure Rails, Angles 14° 15' to 9° 31' 38" Inclusive Single Rail Construction
782-02	Articulated Manganese Steel Crossings, Angles 90° to 60°, Inclusive
783-02	Articulated Manganese Steel Crossings, Angles Below 60° to 40° Inclusive
790-02	Data for Gages and Flangeways at Frogs and Crossings Showing Limits Where Gage Is Not Widened for Curvature
790A-02	Data for Gaging Guard Wear on Solid Self Guarded Frogs
791-02	Tables of Practical Gages and Flangeways for Curved Track
792A-02	Graph Showing Minimum Gages and Flangeways for Curved Track (Diesel Locomotives)
792B-02	Graph Showing Minimum Gages and Flangeways for Curved Track (Steam Locomotives)
793-02	Data Sheet for AAR Standard Wheel Flanges, Treads and Gages

Double Slip Switches and Movable Point Crossings

813-02	No. 8 Double Slip Switch
814-02	No. 10 Double Slip Switch
820-02	Graph Showing Limitations for the Use of Crossings with Rigid Center Frogs

<i>Plan No.</i>	<i>Title</i>
Double Slip Switches and Movable Point Crossings (Continued)	
821-02	Movable Point Crossings
835-02	Plates for No. 10 Double Slip Switch
836-02	Fittings for Double Slip Switches and Movable Point Crossings
Turnout and Crossover Data: Bridge Approach Ties	
901-03	Turnout Geometries and Nomenclature
910-02	Turnout and Crossover Data for Straight Split Switches
911-02	Location of Joints for Turnouts with Straight Split Switches
912-02	Bills of Switch Ties for Turnouts and Crossovers
913-02	Approach Ties for Open Deck Bridges and Trestles
920-02	Turnout and Crossover Data for Curved Split Switches
921-02	Location of Joints for Turnouts with Curved Split Switches
925-02*	No. 8 and No. 10 Lap Turnouts with Curved Split Switches
Track Construction for Pavement	
980-02	Turnout and Crossover Data for Tongue Switch Construction for Use in Pavement
982-02	200' Radius Tongue Switch and Mate for Locomotive Driving Truck with Two Pairs of Flanged Wheels (Diesel or Steam Locomotives), Solid Manganese Steel for Use in Pavement
987-03	Straight Double Tongue Switches for Locomotive Driving Truck with Two Pairs of Flanged Wheels (Diesel or Steam Locomotives), Solid Manganese Steel for Use in Pavement
988-03	Straight Double Tongue Switches for Locomotive Driving Truck with Three Pairs of Flanged Wheels (Diesel or Steam Locomotives- See Note 1), Solid Manganese Steel for Use in Pavement
989-03	Straight Double Tongue Switches for Locomotive Driving Truck with Three or More Pairs of Flanged Wheels (Steam Locomotives- See Note 1), Solid Manganese Steel for Use in Pavement
Data for Rail Sections, Etc.	
1001-03*	Rail Sections – In Use Since About 1900, Light Density and Short Line Railway
1002-03*	Girder Rail Sections
1004-03*	Data for Headfree Rail Sections
1005-03	Beveling of Rail Ends for Special Trackwork

<i>Plan No.</i>	<i>Title</i>
Radiographic Testing of Manganese Frog Castings – Internal Soundness Severity Levels for Various Castings	
1012-03	Radiographic Testing of Rail Bound Manganese Steel Frog Casting, Internal Soundness Severity Levels
1013-03	Radiographic Testing of Solid Manganese Steel Frog Casting, Internal Soundness Severity Levels
1014-05	Radiographic Testing of Manganese Steel Inserts for Crossing Angles 90° to 45° Inclusive, Internal Soundness Severity Levels
1015-03	Radiographic Testing of Manganese Steel Inserts for Crossing Angles 14°15' to 9°31'38" Inclusive, Internal Soundness Severity Levels
1016-03	Radiographic Testing of Manganese Steel Inserts for Crossing Angles 25° to 9°31'38" Inclusive, Internal Soundness Severity Levels
1017-03	Radiographic Testing of Rail Bound and Solid Manganese Steel Knuckle, Internal Soundness Severity Levels
Permissible Variations in Completed Frogs and Switches	
1020-03	Permissible Variations in Completed Switch Points
1021-03	Permissible Variations in Completed RBM Steel Frogs
1022-03	Permissible Variations in Completed Solid Manganese Steel Self Guarded Frog
1023-03	Permissible Variations in Completed Spring Frog
1024-08	Permissible Variations in Completed Switch Clip, Plate and Switch Rod
1025-06	Table of Practical Gages & Flangeway for Curved Track
1026-06	Bolted Rail Crossing
1027-06	Manganese Steel Insert Crossing
1028-06	Solid Manganese Steel Crossing
1029A-06	Standard Method for Inspecting Crossings with Angles From 90° to Greater Than 45°
1029B-06	Standard Method for Inspecting Crossings with Angles From 45° to Greater Than 25°
1029C-06	Standard Method for Inspecting Crossings with Angles From 25° to 14°15'
1029D-06	Standard Method for Inspecting Crossing Angles Between 14°15' and 9°31'38"

*These drawings are sheets of information rather than recommended practice.

<i>Plan No.</i>	<i>Title</i>
Passenger and Transit Drawings	
PT 100-08	Notes for Rapid Transit Switches
PT 111-08	Turnout Data for Rapid Transit Switches, Turnout 3.6 to No. 12, 100 lb. ARA-B Rail Section
PT 112-08	Turnout Data for Rapid Transit Switches, Turnout No. 3.6 to No. 12, 115 lb. RE Rail Section
PT 600-01	Data and Sections for Rail Bound Manganese Steel Frogs
PT 600-A-01	Design Criteria for Rail Bound Manganese Steel Frogs
PT 612-01	No. 6, No. 7 and No. 8 Rail Bound Manganese Steel Frogs
PT 613-01	No. 9, No. 10 and No. 11 Rail Bound Managanese Steel Frogs
PT 614-01	No. 12, No. 14 and No. 15 Rail Bound Managanese Steel Frogs
PT 615-01	No. 16, No. 18 and No. 20 Rail Bound Managanese Steel Frogs
PT 616-03	Data and Sections for Rail Bound Manganese Steel Frogs for Rails 112 lb. and Heavier - Medium Wall
PT 617-03	No. 6, No. 7 and No. 8 Rail Bound Manganese Steel Frogs for Rails 112 lb. and Heavier - Medium Wall

<i>Plan No.</i>	<i>Title</i>
Passenger and Transit Drawings (Continued)	
PT 618-03	No. 9, No. 10 and No. 11 Rail Bound Manganese Steel Frogs for Rails 112 lb. and Heavier - Medium Wall
PT 619-03	No. 12, No. 14 and No. 15 Rail Bound Manganese Steel Frogs for Rails 112 lb and Heavier - Medium Wall
PT 620-03	No. 16, No. 18, and No. 20 Rail Bound Manganese Steel Frogs for Rails 112 lb and Heavier - Medium Wall
PT 793-08	Dimensions for Rapid Transit Wheel Set

TABLE OF CONTENTS – ERRATA SECTION

<i>Plan No.</i>	<i>Correction</i>
706-01	In Note 5 - Specifications, substitute phrase "See AREMA Plan 100-96-01" for "See AREMA Specifications for Special Trackwork."
