# CHAPTER 7

## TIMBER STRUCTURES<sup>1</sup>

### TABLE OF CONTENTS

Part/Section	Description	Page
<b>1</b>	<b>Material Specifications for Lumber, Piles, Glued Laminated Timber and Fasteners .</b>	<b>7-1-1</b>
1.1	American Softwood Lumber Standards PS 20-70 (2007) . . . . .	7-1-3
1.2	Lumber Industry Abbreviations (2007) . . . . .	7-1-3
1.3	Nomenclature of Commercial Domestic Hardwoods and Softwoods (2007). . . . .	7-1-3
1.4	Specifications for Structural Lumber (1969) . . . . .	7-1-3
1.5	Specifications for Engineered Wood Products (2006) . . . . .	7-1-4
1.6	Grading Rules for Hardwood Structural Timbers . . . . .	7-1-7
1.7	Ordering Structural Lumber . . . . .	7-1-8
1.8	Structural Grades of Lumber and Timber and Method of Their Derivation . . . . .	7-1-9
1.9	Specifications for Timber Piles . . . . .	7-1-9
1.10	Specifications and Recommended Practice for Overhead and Other Wood Highway Bridges (2009). . .	7-1-16
1.11	Specifications for Fire-Retardant Coating for Creosoted Wood (1963). . . . .	7-1-16
1.12	Specifications of Fasteners for Timber Trestles . . . . .	7-1-25
1.13	Specifications for Timber Bridge Ties . . . . .	7-1-28
<b>2</b>	<b>Design of Wood Railway Bridges and Trestles for Railway Loading. . . . .</b>	<b>7-2-1</b>
2.1	Design of Public Works Projects . . . . .	7-2-6
2.2	Working Stresses (1990) . . . . .	7-2-6
2.3	Notes on the Use of Stress-Graded Lumber . . . . .	7-2-6
2.4	General Features of Design . . . . .	7-2-10
2.5	Loads, Forces and Stresses . . . . .	7-2-51
2.6	Designing for Engineered Wood Products . . . . .	7-2-54
2.7	Allowable Unit Stresses for Stress-Graded Lumber . . . . .	7-2-63

<sup>1</sup> The material in this and other chapters in the AREMA *Manual for Railway Engineering* is published as recommended practice to railroads and others concerned with the engineering, design and construction of railroad fixed properties (except signals and communications), and allied services and facilities. For the purpose of this Manual, RECOMMENDED PRACTICE is defined as a material, device, design, plan, specification, principle or practice recommended to the railways for use as required, either exactly as presented or with such modifications as may be necessary or desirable to meet the needs of individual railways, but in either event, with a view to promoting efficiency and economy in the location, construction, operation or maintenance of railways. It is not intended to imply that other practices may not be equally acceptable.

## TABLE OF CONTENTS (CONT)

Part/Section	Description	Page
2.8	Details of Design .....	7-2-82
2.9	Comparison of Unit Stresses in Timbers in Open and Ballasted-Deck Trestles (1957).....	7-2-83
2.10	Rules for Rating Existing Wood Bridges and Trestles .....	7-2-120
2.11	Recommended Practice for Design of Wood Culverts (1962) .....	7-2-124
2.12	Recommended Practice for Simple Stress Laminated Deck Panels .....	7-2-127
2.13	Temporary Structures .....	7-2-146
<b>3</b>	<b>Construction, Maintenance and Inspection of Timber Structures .....</b>	<b>7-3-1</b>
3.1	Workmanship for Construction of Pile and Framed Trestles .....	7-3-3
3.2	Driving Timber Piles (1984) .....	7-3-6
3.3	Instructions for Inspection of Timber Trestle Railway Bridges .....	7-3-13
3.4	Typical Plans for Timber Railway Bridges .....	7-3-21
3.5	Methods of Fireproofing Wood Bridges and Trestles .....	7-3-41
3.6	Use of Guard Rails and Guard Timbers (2004).....	7-3-42
<b>Chapter 7</b>	<b>Glossary .....</b>	<b>7-G-1</b>
<b>References</b>	<b>.....</b>	<b>7-R-1</b>

### INTRODUCTION

The Chapters of the AREMA Manual are divided into numbered Parts, each comprised of related documents (specifications, recommended practices, plans, etc.). Individual Parts are divided into Sections by centered headings set in capital letters and identified by a Section number. These Sections are subdivided into Articles designated by numbered side headings.

**Page Numbers** – In the page numbering of the Manual (7-2-1, for example) the first numeral designates the Chapter number, the second denotes the Part number in the Chapter, and the third numeral designates the page number in the Part. Thus, 7-2-1 means Chapter 7, Part 2, page 1.

In the Glossary and References, the Part number is replaced by either a “G” for Glossary or “R” for References.

**Document Dates** – The bold type date (Document Date) at the beginning of each document (Part) applies to the document as a whole and designates the year in which revisions were last made somewhere in the document, unless an attached footnote indicates that the document was adopted, reapproved, or rewritten in that year.

**Article Dates** – Each Article shows the date (in parenthesis) of the last time that Article was modified.

**Revision Marks** – All current year revisions (changes and additions) which have been incorporated into the document are identified by a vertical line along the outside margin of the page, directly beside the modified information.

**Proceedings Footnote** – The Proceedings footnote on the first page of each document gives references to all Association action with respect to the document.

**Annual Updates** – New manuals, as well as revision sets, will be printed and issued yearly.
