

American Railway Engineering and Maintenance of Way Association

Letter Ballot 07-22-04

Proposed changes as follows:

Deleted text noted by ~~strikethrough~~.

Added text shown in underline.

Add Definitions to Glossary Item 3. Terms, as follows:

Backwall (Headwall)

A wall constructed behind the end row of piles that serves as a retaining structure.

Cap

A bent component spanning over the tops of all piles or posts in the bent that distributes superstructure loads to the piles or posts.

Headwall

See Backwall.

Wingwall

An extension of the backwall.
