Recommended Configuration Plan for Grade Crossing Warning Devices With or Without Gates, One or More Tracks, Right Angle Crossing, Divided Highway, Signals in Median, Three Lanes Each Way
Revised 2021 (3 Pages)

Figure 3136G-1: Single Or Multiple Track, Without Gates, With Median Signals

Note 1 – Where minimum clearances and preferred dimensions cannot be achieved, actual locations of devices and gate arm length may vary based on recommendations of a diagnostic team.

Note 1 – Where minimum clearances and preferred dimensions cannot be achieved, actual locations of devices and gate arm length may vary based on recommendations of a diagnostic team.

Note 2 – Unless specified on the plans the gate arm shall extend across at least 90% of each approach lane.

Note 3 - See Manual Part 3.1.36, Recommended Functional Guidelines for Configuration Plans for Grade Crossing Warning Devices for additional information.
Figure 3136G-3: Single Or Multiple Track, With Median Split Gates Outside Of Cantilever

Note 1 – Where minimum clearances and preferred dimensions cannot be achieved, actual locations of devices and gate arm length may vary based on recommendations of a diagnostic team.

Note 2 – Unless specified on the plans the gate arm shall extend across at least 90% of each approach lane.

Note 3 - See Manual Part 3.1.36, Recommended Functional Guidelines for Configuration Plans for Grade Crossing Warning Devices for additional information.
