
CHAPTER 12

RAIL TRANSIT¹

FOREWORD

Chapter 12, Rail Transit is intended to serve as a guide and offer insight for planning, design and maintenance of a rail transit system. Recognizing the importance of the technical considerations required in the design, construction and maintenance of a rail transit system, the well informed choices of the engineering professional are of utmost importance. The available methods, components and applications are many and varied, therefore concise and clearly defined criteria are essential when developing goals and objectives. This chapter endorses the AREMA recommended practices from other chapters when possible, and recognizes that many of the topics within require extensive coordination with other chapters in the manual. Various techniques, components and methodologies for construction and maintenance must be evaluated fairly and accurately in order to consider alternative concepts on an equal basis. The reader is encouraged to evaluate the methods and effective practices utilized by the many operating rail transit systems in North America, and to utilize this manual and chapter as a basis for work on existing and proposed systems.

¹ The material in this and other chapters in the AREMA *Manual for Railway Engineering* is published as recommended practice to railroads and others concerned with the engineering, design and construction of railroad fixed properties (except signals and communications), and allied services and facilities. For the purpose of this Manual, RECOMMENDED PRACTICE is defined as a material, device, design, plan, specification, principle or practice recommended to the railways for use as required, either exactly as presented or with such modifications as may be necessary or desirable to meet the needs of individual railways, but in either event, with a view to promoting efficiency and economy in the location, construction, operation or maintenance of railways. It is not intended to imply that other practices may not be equally acceptable.

TABLE OF CONTENTS

Part/Section	Description	Page
1	Introduction	12-1-1
1.1	General Information	12-1-2
1.2	Safety/Security	12-1-3
2	Corridor Planning Considerations	12-2-1
2.1	General Information	12-2-3
2.2	Planning	12-2-4
2.3	Data Collection	12-2-8
2.4	Corridor Identification	12-2-11
2.5	Corridor Evaluation	12-2-12
2.6	Selection of Rail Transit Technology	12-2-14
2.7	Regional Transportation Interfaces	12-2-23
2.8	Corridor Implementation Strategies	12-2-24
3	Track and Roadway Considerations	12-3-1
3.1	General Information	12-3-2
3.2	System Design Criteria	12-3-3
3.3	Clearances	12-3-12
3.4	Right-of-Way Design Criteria and Considerations	12-3-14
3.5	Track and Roadway	12-3-20
3.6	Design Considerations for Future Expansion	12-3-35
4	Facilities and Structural Considerations	12-4-1
4.1	General Information	12-4-4
4.2	Passenger Facilities	12-4-4
4.3	Multi-Modal Facilities	12-4-7
4.4	Yards and Shops	12-4-10
4.5	Bridges and Drainage Structures	12-4-34
4.6	Crash Walls	12-4-87
4.7	Tunnels	12-4-87
4.8	Segmental Girder Guideways	12-4-94
4.9	Direct Fixation	12-4-96
5	Vehicle Considerations	12-5-1
5.1	General Information	12-5-2
5.2	General Considerations	12-5-2
5.3	Design Considerations	12-5-2
6	Signals, Communications, and Propulsion Considerations	12-6-1
6.1	General Information	12-6-2
6.2	Operations Centers	12-6-2
6.3	Signal Systems	12-6-2
6.4	Communications Systems	12-6-2
6.5	Propulsion Systems	12-6-2
7	Maintenance of Way Considerations	12-7-1
7.1	General Information	12-7-3
7.2	Maintenance Philosophy	12-7-3
7.3	Inspection, Evaluation, and Planning	12-7-3
7.4	Right of Way Maintenance	12-7-4

TABLE OF CONTENTS (CONT)

Part/Section	Description	Page
7.5	Track Maintenance Limits	12-7-4
7.6	Track Maintenance Operations	12-7-5
7.7	Structures Maintenance Operations	12-7-5
7.8	Signal and Communications Maintenance Operations	12-7-6
7.9	Propulsion System Maintenance Operations	12-7-6
7.10	Facility Maintenance Operations	12-7-7
8	Embedded Track	12-8-1
8.1	Introduction	12-8-2
8.2	Embedded Track Alignment	12-8-4
8.3	Wheel Rail Interface	12-8-8
8.4	Rail	12-8-8
8.5	Rail Fixation (Fastening)	12-8-22
8.6	Support Structure	12-8-22
8.7	Special Trackwork	12-8-22
8.8	Stations, Stops, Passenger Access & Safety	12-8-22
8.9	Other	12-8-23
8.10	Appendix A - Commentary on Analysis of Lateral Acceleration and Jerk Rate for Establishing Superelevation and Spiral Length	12-8-23
Chapter 12	Glossary	12-G-1
